Subject: microsoft settlement

In my humble opinion the witch hunt of Microsoft has gone on far too long. Let the marketplace take care of them. The rapid move to Linux shows that MS does not in fact hinder other companies efforts. We have one PC using Windows and another using Mandrake Linux. Linux is somewhat harder to grasp than Windows. Let's allow the free market to work. Many people are using Windows because Linux is harder to install and use.

Sincerely,
Alvin C. Smith
